DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 7/29/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,876,178 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

- Claims 1-8 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or suggest, inter alia, a hybrid reactive power compensation device parallel connected to a power system to provide reactive power to improve the power factor, comprising: an active type reactive power compensator serially connected to a passive type reactive power compensator; wherein the passive type reactive power compensator provides reactive power so that power capacity of the active type reactive power compensator is reduced; the active type reactive power compensator can supply a linearly adjustable reactive power within a predetermined range; the active type reactive power compensator is adapted to provide a current with a nearly sinusoidal waveform for reactive power compensation, thereby avoiding destruction of the passive type reactive power compensator caused by a power resonance.

Application/Control Number: 10/646,755 Page 3

Art Unit: 2838

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,573,691 Ma et al disclose a control system and method for voltage stabilization in electric power systems; US 6,329,798 Huggett et al disclose a voltage controller for minimizing the utility power provided to a local load site having a local power source; US 4,503,380 Thanawala discloses a static reactive compensator.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary L. Laxton whose telephone number is (571) 272-2079. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on (571) 272-2084. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair_direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
